

المعهد الكوري الفلسطيني المتميز لتكنولوجيا المعلومات

Advanced ETABS Training Course

Course Objectives

After completing this course, you will be able to:

- Analyze design of real buildings using ETABS considering earthquake load.
- Follow IBC code in the seismic design.

Prerequisites

The course is designed for students who can employ ETABS to analyze and design real structures.

Course Contents

Students will be guided and supervised to analyze and design a real building for gravity and earthquake loads by following the IBC code.

Course Duration

20 hours.
